

GROUND FORCE GUTTERS LLC

Ground-Level Gutter Cleaning · No Ladders, No Lifts, No Roof Access

UEI HZUFCGJN7CZ3

CAGE 21DN6

743 Tennypark Ln, Mt. Juliet, TN 37122

Ground Force Gutters LLC is a veteran-owned Tennessee small business providing gutter cleaning for government, commercial, and institutional facilities across Middle Tennessee. Every job is performed from ground level with an industrial vacuum system — removing the ladders, aerial lifts, roof access, and work-at-height exposure that make conventional gutter cleaning an administrative problem for facility managers.

CORE COMPETENCIES

- **Gutter cleaning by ground-level vacuum extraction** — debris pulled up and out into a sealed tank on one- and two-story buildings, performed entirely from a standing position on the ground.
- **Multi-building and campus service** — priced by gutter footage and access rather than by unit or door, delivered as a single scheduled action across an entire property.
- **Photographic condition documentation** — matched before-and-after imagery of every gutter run, supplied as a digital report suitable for closeout files and inspection records.
- **Complete debris removal and disposal** — all material leaves the property; nothing is bagged and staged for facility staff to handle.
- **Recurring scheduled maintenance** — annual, semi-annual, and quarterly cycles with fixed pricing and advance scheduling.

DIFFERENTIATORS

- **No aerial equipment, no staging footprint.** No boom lift or scissor lift means no blocked parking, no obstructed sidewalks, and no ADA access route taken out of service during the work.
- **No roof contact.** Nobody sets foot on the structure. This removes the roof-access permit, the building-manager liability question, and any risk of foot-traffic damage to metal, tile, or slate roofing and fastener seals.
- **No work-at-height exposure.** Ground-level operation eliminates the fall hazard entirely — no fall-arrest equipment, no competent-person sign-off, no height permit, and no associated OSHA administrative burden for the facility.
- **No facility downtime.** Work proceeds during normal operating hours without closing entrances, lobbies, or pedestrian routes.
- **Single point of contact.** Owner-operated. The person who quotes the work performs the work and answers the phone afterward.

HOW TO BUY

Single-building service is typically **\$275–\$450**, well below the FAR 2.101 micro-purchase threshold of **\$2,500** applicable to services subject to the Service Contract Labor Standards. Individual buildings can generally be acquired by **Government Purchase Card** without a formal solicitation. Certificate of Insurance issued on request with additional insureds named as your contract requires.

REPRESENTATIVE FACILITY TYPES

Federal

- Resource manager & project offices
- Visitor centers and interpretive buildings
- Outpatient clinics and ancillary buildings
- National cemetery administration buildings

State & Municipal

- State park visitor centers & ranger stations
- Regional agency offices
- School and library campuses
- Public housing and parks buildings

Institutional

- Multi-building HOA and condo communities
- Apartment and multi-unit properties
- Churches, schools, and daycares
- Warehouses, offices, and retail centers
